# Guide introduction

*This is the guide of the Girl House game, created by [@Astaros3D](#). You can find this game on [Patreon](#). If you like the game, please consider to support the work.*

*Disclaimer! I do not take responsibility for any error or fault regarding this guide. I try my best to cover everything in the game, but as I'm a human I might make mistakes. Every mistake will be corrected if anyone report it to me via [e-mail here](#).*

*As I'm not a native English speaker, sorry for any spelling/language mistake.*

## Gameplay

In this game you are... well... God knows who you are, you only know your name and some minor stuff. But still you have to escape, remain hidden and figure out what happened and who you are.

And of course, what kind of game would this be without girls, so there are girls too, and you can start to „work on them” with the help of your two new helper.... Well, you will be able to decide if they are really help you or not. ☺

## Prologue

Small prologue summary: Car. Blowjob. No brakes. Accident. If you want to see more, just follow the events, there are even some nice animation there. At the end you'll be in the hospital with a nice doc and a not-so-nice cop, and your journey begins!

## New interface and game system

After you got the phone from the Hall after you completed the Stranger beater quest, your game will change forever. You have to know, you was just being there, but from that point, you'll truly live!

### Smartphone

From now on you can use your phone, to check some stats and see what can be done.

#### *Shop*

In the shop you can buy different things which will help you achieve what you want. You need money for them, but of course you can get the money from some work. Check item list for the items.

#### *Tasks*

Here you the see all the currently active quests you have. You click on them to see some information about that task.

#### *SMS*

Here you can see all the girls phone number you got. You can occasionally send them SMS texts, also you can get some too.

#### *Camera*

The camera app can be used to take some nice images. Currently only in events. You can get image of Lola and Vanessa.

#### *Settings*

In the phone settings you can only change the background image of the phone.

#### *Map*

You can use the map after the lawyer helps you. The places will open up one after another.

#### *Gallery*

You can see the images here which you shot with the camera app.

#### *Video*

The video you captured. And remember, you promised to delete it. Great....

## Social Network

You can check the social account of your contacts, but there isn't much there.

## Affection

You can see every girl here and you can see their love and lust level. The dark red heart means that you have higher than 10 level of love.

## Photo

Nothing is here.

## Girls

Each girl have a normal life.... well, „normal“. So they won't be in their room all day, they'll go and do their stuff. You can catch them as the following table shows.

They may also appear in other rooms during a given time, but only for some events.

## PDA gallery

There is a list of the image you can take with your phone in the game. Also there is what you get is messages, and such.

You get this image when you got the message from the lawyer to go to her office.

You got this image when you get the message in which the lawyer tell you she will come to your house.

When Mia ask you to get proof that Lola is not angel, you can make this image while she sleeps.

After you blackmail her, you can take this photo to make the proof for Mia.

When you convince Lola to have sex, you can take this photo before you put the lubricant on her.

When you convince Lola to have sex, take the picture after you enter her.

When you offer Vicky to put some sunscreen on her, you can take this photo before you put the sunscreen on her.

You can take this picture when you put the sunscreen on Vicky. This photo can be taken after Vicky turn around.

You can take this photo when you offer Vanessa to put some sunscreen on her.

You can take this photo when you offer Vanessa to put some sunscreen on her after you gave her the new swimsuit.

## Minigames

### Roulette

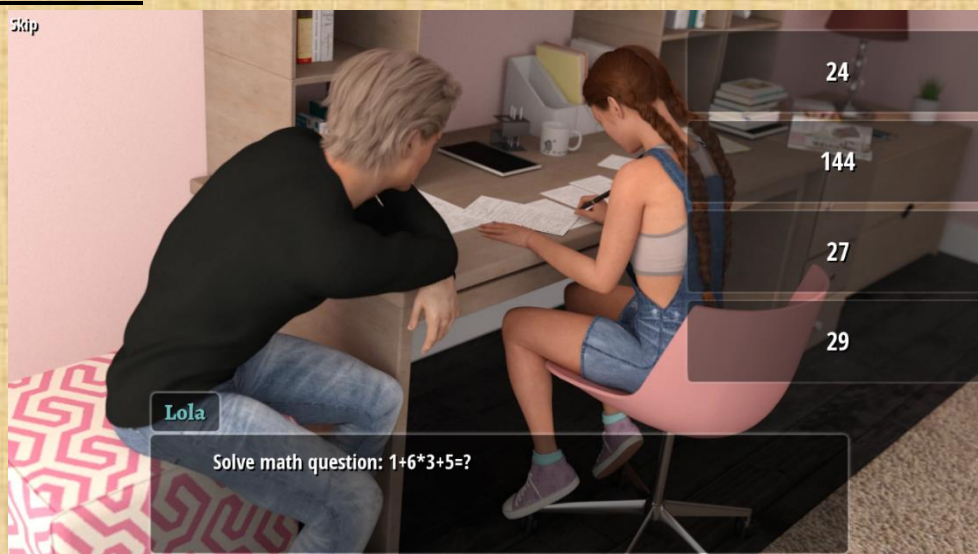

After you get your laptop, the battery and then the password, you can play a bit of roulette game. The game is simple:

- You just have to select the amount of money
- The place where you want to place it.

- As normally, you can place bets on a certain number, a number range, color, even or odd number, etc. After you placed the bet the roulette will spin and of course if you win, you'll get the reward. Beware however, you can't win much. If you win too much, the system will mark you as fraud, you'll lose the last win and you won't be able to play anymore. The best strategy is to save regularly to save up as much as you can.

## Math homework

Easy little minigame... at least for those who have at least basic education.

You have to answer correctly some mathematical questions. You have unlimited time to answer, so you can just use a calculator. 😊

You have to answer 10 question correctly to win this minigame.

If you don't want to participate, or you are annoyed by it, you just have to get the extra version in which you have a skip button to use.

## Picture repair

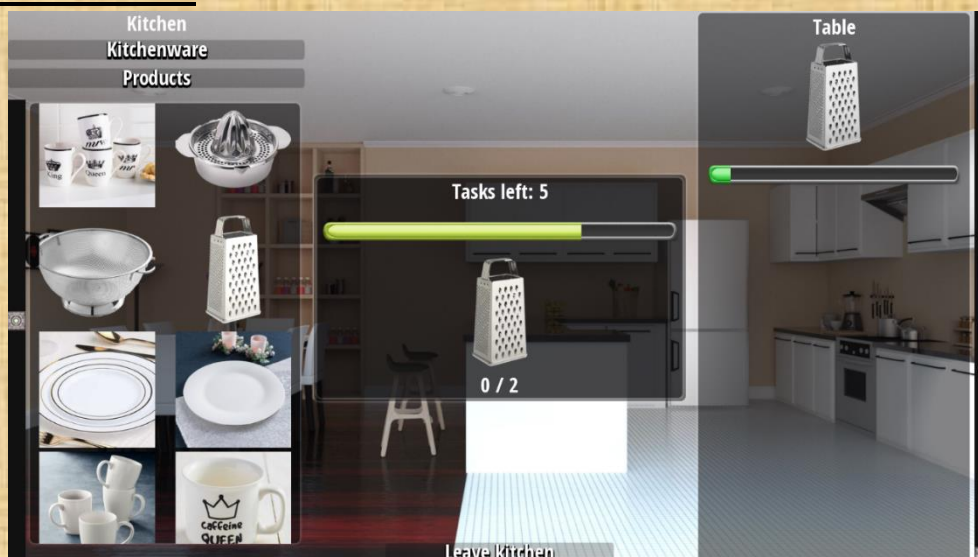

Again a little minigame, in which you have unlimited time to repair a nice image.

You have to drag the pieces of the picture into their correct places. The pieces which are in their correct position can't be moved again.

Again if you don't want to suffer with this, just get the extra version where you'll find a skip button.

## Help in the kitchen

In this minigame, you have to help Vanessa in the kitchen.

You'll see three part of the screen, the left part is where you see the kitchenwares and products in two lists. You have to use these lists, to finish the tasks.

On the right part is the table, you have to put the stuff here, and you see that how much time you still need to put those on the table.

The middle part is the tasks bar, where you'll see what you need to put on the table and also that how much time you have left.

The task is easy, you have to search in Kitchenware and Products list for what you see on the middle part, and just click on them. And watch out for the time.

You can do this minigame every day once, and you'll get \$17 each time.

## Rat buster

Now this could be a familiar minigame. 😊

You have to buy the rat killer spray from the shop, in the phone.

After you have to get the basement key. To get it, you have to wait until the doctor comes to the house, then ask Vanessa if there anything you can help with.

After you get the key, go and unlock the door, then go to the basement. Select the spray from you inventory, then go forward.

Now you have to kill 20 rats, you have to click on them. As you can see the possible positions of the rats above it should be pretty simple. After you killed them, you finished the quest, and you can get the laptop battery.

## Fighting

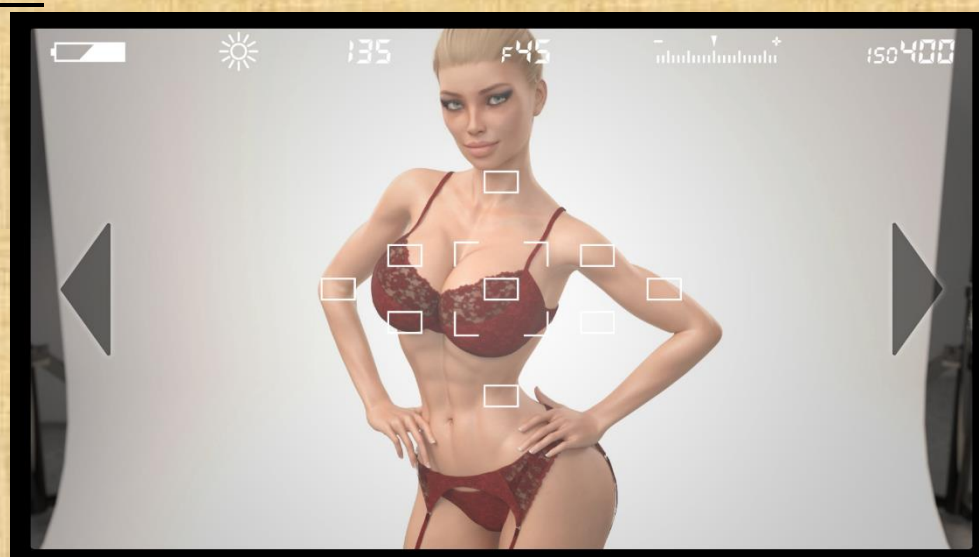

There is a fighting in this game, where you need to defend the girls. For now it's just Vanessa who you need to defend against a stranger.

There is a bar on the top left of the game which will represent the enemy's healthpoint, and there is a bar on the top right side too, which will be your health.

On the bottom, there will be three button with which you can control the fight. From left to right

- Apperkot (Heavy attack)
- Block (Defend)
- Cross (Fast attack)

## Photoshoot

The goal of this minigame, is to find the perfect angle for the perfect picture. It's quite easy to do so, because Bella will tell you if the angle was right or wrong (also there is a small animation when the angle is right). But if you want to find a quick way to the good one, here is the list:
