

New Quest's Added in version 3.75.

Quest 186: The Contact

Activation requirements: Must have completed **Quest 184 "Daiyu's Birthday"**

Location: The Black Dragon

If you talk to Daiyu the day after (or later) completing the birthday quest, she will ask you to meet one of her contacts to buy a magical collar. The contact is waiting at the Merchant's Inn (The inn along the Western Road). Upon entering the inn you are set upon by three wraiths, use magic or magical/light based weapons to defeat them.

It turns out Erevi's daughter is Daiyu's new contact and decided to double cross her to increase her allowance a bit. Since you just foiled her plans, she'll ask you for some cash to buy some clothing from Edgar so she can go out in Greyport (Giving her more money may save you in the long run).

Return to Daiyu to deliver the collar. She'll reward you with a new sex scene.

Quest 187: The Ripper

Activation requirements: Must have completed **Quest 90 "A New Home"**, Reanna must have had at least one child, you must have delivered at least one bandit/thug to the Magistrate, Reanna isn't currently pregnant.

Location: The Magistrate

When asking the magistrate for more work (after completing the conditions listed above), he will tell you that an increased number of bodies have been turning up lately, especially at night. He'll ask you to keep an eye out and deal with whoever is responsible for the murders.

After dark, look for bloody dragmarks along the main street in the inner city. If you can't find any marks/tracks, walk onto another map section and return to the Inner city (this will force another spawn attempt). Follow the drag marks into the alley to confront the killer. You will need to use an agility potion to avoid alerting the killer to your presence. Otherwise, he/she will run off before you can confront him/her.

It turns out Reanna is famished after having a long gestation period and has been feeding on the townsfolk.

Solution 1

If you have acquired the Greyport Sewer Key (must have completed **Quest 182 "The Escort"**), you can make a copy at the Blacksmith in Greyport and give Reanna the spare. This way she can hide the bodies in the sewers.

Solution 2

Get Reanna pregnant again, once she is at least five days pregnant, she will be too encumbered to hunt. This should also reduce the body count (at least for a while).

Reanna and hunting

After dark there is a 50% chance that Reanna is on the hunt. This is rolled each time you enter the Inner-City map. Note: Reanne does not hunt when she is 5 or more days pregnant. She likes being chased, so she won't give in easily. You will therefore always need to consume an Agility potion before confronting her. Once you have tracked her to an alley (successful or not) she won't return until the following night.
